

EDUCATION

Full Sail University, Winter Park, Florida

Bachelors of Cyber Security, GPA : 3.94/4.00

- National Society Of Colligate Scholars

Full Sail University, Winter Park, Florida

Associates of Information Technology, GPA : 3.95/4.00

TECHNICAL SKILLS

- **Web Development** : HTML, CSS, JavaScript, jQuery, React, SQL, NoSQL, Postgres, MongoDB, Prisma, WebFlow, GIT
- **Networking** : Python, MacOS, Linux, and MS Windows set up, installation, configuration and troubleshooting, SolarWinds, NMAP, Wireshark

PROFESSIONAL EXPERIENCE

Instructor - Mentor

Jan. 2023 – present

Fullstack Academy

- Instructed 10+ cohorts (10–30 students each) in full stack web development, covering technologies including HTML5, CSS3, JavaScript (ES6+), React, Git, PostgreSQL, and SQL.
- Led live coding sessions and hands-on labs focused on responsive design, frontend architecture, API integration, state management, and RESTful services.
- Customized existing courseware to align with cohort-specific pacing and learning modalities; introduced supplementary projects to reinforce foundational and advanced concepts.
- Collaborated with technical mentors **and** program managers to assess individual student performance against defined technical benchmarks and implement data-driven remediation strategies.
- Facilitated version control workshops using Git and GitHub, emphasizing branching workflows, pull requests, and team-based collaboration practices.
- Conducted **code reviews** and graded assignments with a focus on code quality, readability, and adherence to industry best practices.
- Provided individualized technical coaching, debugging support, and conceptual reinforcement in one-on-one sessions.

Software Engineer

May 2021 – Jan 2023

Allmoxy| Ogden, Ut

- Developed and maintained web applications using PHP, JavaScript, and jQuery to support business operations and enhance user experience.
- Translated Figma design prototypes into responsive and accessible webpages in close collaboration with the design team.
- Utilized Git for version control, managing branches and coordinating with other developers to ensure smooth code integration and deployment.
- Worked cross-functionally with the QA team using Jira to track bugs, manage feature requests, and support agile development workflows.
- Participated in regular code reviews and team meetings to improve code quality and ensure alignment with project goals.

Full Stack Web Developer Teaching Assistant

Mar. 2021 – May 2021

Vschool

- Subject Matter Expert in react development, responsible for assisting students in learning and understanding material related to user experience, industry standards, debugging, and more.
- Developed reusable components in JavaScript, HTML, CSS, and node.js.
- Worked with 8 boot camp students and maintained consistently positive reviews and feedback.
